Web Care House Private Limited was formed with the clear goal to provide quality software development & IT services.

We are equipped with state-of-the-art infrastructure to cater to nearly every software development requirement:

- Modern office set-up with state-of-the-art development centre.
- High speed connectivity to internet gateway.
- Latest hardware and licensed software
- Custom built testing software applications.
- Adequate communications infrastructure.
- Reserve employee resource pool.
- Data backup systems and redundant backup servers.
- Redundant Power backups through Generators and Inverters.
- Secure access for all employees.

COMPANY SERVICES

Web Care House delivers quality and timely solutions and services at a price that makes our clients smile. Web Care House focuses on offshore development at our excellence.. This allows us to scale up rapidly (leveraging on the plentiful supply of talent and thus cutting down on execution time) at costs that are on an average 70% cheaper.

An in-depth knowledge of various technology areas enables us to provide end-to-end solutions and services. With our 'Web of Participation', we maximize the benefits of our depth, diversity, and delivery capability, ensuring adaptability to client needs, and thus bringing out the most innovative solutions in every business and technology domain

Web Care House is your one stop partner where you can outsource all your support services with complete peace of mind about quality and reliability. Web Care House Software Solution's strength lies in understanding the client's business processes, culture, vision, and goals across the industry segments and offering client oriented solutions which are highly reliable, creating customer comfort.

Our team is committed to provide IT Services with:

Quality | Technology | Innovation

Our Services:

- Software Development
- Web Solution
- SEO (Search Engine Optimization)
- Digital Marketing
- eCommerce
- Graphic Designing
- Branding
- Business Consultancy
- Quality Assurance & Testing
- Application Maintenance & Support

SERVICES

SOFTWARE DEVELOPMENT

Web Care House has developed a number of products and MIS applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the “on-time and on-budget” delivery of software in the offshore mode. We use a highly effective IMPACT Methodology for offshore and distributed software development. Our services begin from analysis, moving through designing, development, testing and implementation to maintenance. Our applications come in all sizes, be it a one-table database, or a massive client-server application. The creation of complete database applications is yet another field that we specialize in.

We offer:

1. Application Development

- Interactive Application Development
- Custom Application Development/ Maintenance
- MIS and ERP Solutions & Support

2. Re-engineering

APPLICATION DEVELOPMENT

Interactive Application Development (iAD) is about harmonizing art with technology. This business division of Web Care House complements the client’s requirement of online and desktop applications - be it a workgroup solution or mailing platform. It adds a further arc to the circle of ‘Net Totality’.

SERVICES

A strong team of software professionals empowers the application development capability at iAD, Web Care House. The applications developed range from Web-stores, online service retailing to enterprise information systems. Our competencies in .Net technologies, ASP, XML, PHP and C/ C++ are demonstrated in various network-based applications. SQL/ Oracle database engines support most of these applications.

CUSTOM APPLICATION DEVELOPMENT/ MAINTENANCE

It is a well known fact that some of the ready-made, packaged applications have failed to meet the requirements of the customers because of their unique needs and differing business practices and processes. In addition, prohibitive cost of implementing a packaged application and the maintenance thereafter becomes an unwelcome perspective.

We have experienced I.T. Consultants for Project analysis, formulation and concept planning, right up to project management and installation. We develop customized Software that is completely based on user's requirement with GUI (graphical user- friendly interface) on any of the mentioned platform / languages.

MIS AND ERP SOLUTIONS & SUPPORT

We offer customized low cost solutions to industries based on open standards, contemporary technologies and maintenance support. While incorporating the best of business practices, we do take special care of the customer requirements.

ERP Solutions include the development of software in a distributed model, with some phases of the project being conducted onsite and others being conducted offshore. Each phase is uniquely defined and executed. After unit, and system testing the product is then sent to the client for acceptance testing. We have satisfied customers find the solutions user friendly, flexible, and comprehensive.

SERVICES

REENGINEERING

Reengineering Business Reengineering is on the agenda of many companies in different industries. Striving to improve business processes to better meet customer requirements, Business Reengineering initiatives aim at revolutionizing key performance criteria, such as cost, delivery, and quality. As this is a top management issue we ensure that the structure, the work-place contents, the information technology in use and the culture of the organization will successfully assimilate the improved processes.

To tackle with hard and soft barriers and make the reengineering process a success we make sure that following steps are taken in each project:

- √ Diagnosing resistance to change
- √ Managing individual change
- √ Coaching tools and techniques for helping employees navigate the change process
- √ Implement work teams and case managers extensively throughout the organization.
- √ We believe creative thinking cannot be replaced with software tools and stay away from over sophistication
- √ Build learning, renewal, and short feedback loops into business processes.

SERVICES

WEB SERVICES

Web Care House provides web solutions & services to help customer reach to a wider customer base. The web is a new and different medium for communication and requires a different viewpoint and skill set to use it in the most effective way. SERVICES

NETWORKING SOLUTIONS

Web Care House can network your computers together by peer-to-peer or using a server based network and connect you to the Internet. We will help you secure a domain name, locate an Internet service provider, and configure your network for T1-T3, Dialup, DSL, Cable or connection sharing. We can establish remote access setups, which will help an employee, stay in touch with the workplace, irrespective of the geographical location.

We offer following networking services:

- Preparation of Network Architecture (Network protocol, Backbone at twisted wire, cable or optical fiber, Net topology, Hub/Switches, Conceptual Diagram etc).
- LAN/ WAN set-up.
- Corporate Intranets
- Network Administration.
- Windows NT/ Novell Netware/ UNIX/ Linux Server support.
- IIS Support and ORACLE/ SQL Server administration.

QUALITY ASSURANCE & TESTING

All the software solutions developed undergo following cycle of testing:

Requirements Analysis:

Testing begins in the requirements phase of the software development life cycle.

Design Analysis:

During the design phase, testers work with developers in determining what aspects of a design are testable and under what parameter those tests work.

www.webcarehouse.com

SERVICES

Test Planning:

Test Strategy, Test Plan(s), and Test Bed creation.

Test Development:

Test Procedures, Test Scenarios, and Test Cases & Test Scripts to use in testing software.

Test Execution:

Testers execute the software based on the plans and tests and report any errors found to the development team.

Test Reporting:

Once testing is completed, testers generate metrics and make final reports on their test effort and whether or not the software tested is ready for release.

Retesting the Defects

In this cycle applications are passed through following levels of testing:

- Component testing tests the minimal software item that can be tested.
- Component integration testing exposes defects in the interfaces and interaction between integrated components.
- System testing tests an integrated system to verify that it meets its requirements.
- Acceptance testing allows the end-user or customer to decide whether or not to accept the product.
- After modifying software, either for a change in functionality or to fix defects, a regression test re-runs previously passed tests on the modified software to ensure that the modifications haven't unintentionally caused a regression of previous functionality.

SERVICES

APPLICATION MAINTENANCE & SUPPORT

We have years of experience in executing maintenance projects. Our team of experienced consultants has been successfully managing maintenance projects of local clients as well as offshore ones.

The quality of product deployment, training and support has everything to do with customer success and satisfaction. We offer annual maintenance plans which are tailor-made as per the client's requirement. If required we depute technical team which works at the client site for the system execution or support as per requirement.

Our clientele includes Government organizations as well. We ensure maximum return on investment to the customer as we provide complete offsite telephone support in the form of consultations, assistance and advice on the use and maintenance of the Licensed Software. Our experts' providing technical assistance and advice for problem diagnosis and resolution, have gained us admirer world over.

We also offer on-site service calls to Customer's facility. In such cases, our consulting charges are subject to service hour charge, plus reasonable travel and out-of-pocket expenses.

PROJECT MANAGEMENT

INTRODUCTION

The aim of Web Care House Project Management Service is to meet all contractual commitments and thereby meet and possibly exceed the customer's expectations. Web Care House Project Management Service covers all phases from project preparation and execution through transfer to the care phase, and closure of the project. The deliverable of Web Care House Project Management Service is:

SERVICES

- Upfront investment and professionally managed project start-up.
- Highest caliber technical management.
- Accurate and transparent project control and reporting.
- Solid service supplier management.
- Systematic project and quality management.
- Project communication management with regular meetings and collaborative tools.
- Health and safety management matching Web Care House guidelines and local legislation.

PROJECT PREPARATION AND START-UP

The conditions for successful project are created prior to actual deployment. Therefore Web Care House invests extra resources in the project preparation and start-up phases.

The Web Care House project preparation phase includes the following activities:

- Project manager nomination and a detailed project plan for the customer project, including
- complementary plans (if any).
- Planning and implementation guidelines.
- Web Care House resource evaluation and planning.
- Contract preparation with subcontractors.
- Risk management.

SERVICES

HANDOVER AND ACCEPTANCE COORDINATION

This includes the interface with the customer and coordinating final deliverable handover meetings, information and document transfers. It covers the software installation and commissioning and acceptance from the customer.

PROJECT REPORTING AND MEETINGS

Web Care House project team will facilitate bi-weekly (or as agreed) project meetings with the customer, where the project progress, quality, risks, changes and so on are reported to the customer.

TECHNICAL MANAGEMENT

INTRODUCTION

Web Care House approach to the successful integration and launch of complex software utilities is based on a stable pool of highly trained software engineers and a dedicated technical manager. This team is equipped with all the key core skills and the support to see to it that agreed objectives are met in a punctual, effective, and cooperative manner.

SERVICES

TECHNICAL MANAGEMENT RESPONSIBILITY AREAS

IMPLEMENTATION MANAGEMENT

- The technical manager is responsible for planning and managing the application implementation.
- The technical manager leads the implementation planning, plus the commissioning and integration work to obtain customer acceptance of the application elements.

SYSTEM ACCEPTANCE TESTING

Definition of all acceptance processes, procedures, criteria, and system acceptance test plans that are in line with the terms and conditions of the contract with the customer.

- Tracking and monitoring of acceptance progress, clarification of any open issues, and the definition of action plans needed to have a pro-active approach to avoid delays in acceptance.
- Monitoring of key performance metrics and fault resolution with the customer to make sure that business needs are met and that quality of service is maintained as agreed.

FAULT MANAGEMENT

- Support for application modules integration. If problems are encountered at integration, the technical management team takes the lead in troubleshooting and fault resolution activities until all faults are identified and the module is successfully integrated.
- Impact analysis to determine the extent of the fault. In some cases the outcome of a failure report may be a software correction.
- Fault management is supported by WebCareHouse customer care organization.

SERVICES

CONFIGURATION MANAGEMENT

Management of customer software release upgrades and updates, as well as maintaining a reference list with required software/hardware levels and parameters as agreed with customer.

PROJECT PLANNING

During a kick-off and consequent planning meetings with the customer following topics are agreed:

- Non-disclosure agreements (NDA)
- Technical scope
- Processes and documentation
- Share of responsibilities
- Schedule
- Reporting

DATA ENTRY

Our advanced staff of data professionals can prepare your data for you on the media of choice. We can email daily, weekly, or at the end of the job or simply send a CD-Rom or DAT tape with your final data.

E-BUSINESS

The top priority of every company today is managing costs. Lower costs mean higher cash flows. Cash is king. It gives the companies the flexibility to be the price leader, to spend on new products and to offer better customer service.
